This grievance is in continuation from a inquiry on 9-21-22, pertaining to the policy in regards to permitting flash drives (thumb drives) and permitting access to alternatives to the word processor. I am requesting that Administration lift the ban on permitting flash drives and permittin prison friendly laptops as a alternative to the obsolete word pocessors. Thank you.

The option of flash drives is currently being reviewed and considered by Administration. The population will be advised once a decision has been rendered.

This appeal is to lift the policy against permitting flash drives to the population. In addition to permitting a alternative to the word processor. as currently situated, the policy affects the right to meaningful legal access to the courts
